ENTERED AT SAN FRANCISCO, CAL. AS SECOND-CLASS MATTER

DOWN-TO-THE-MINUTE SURGERY

Murphy's Famous Clinics

Here are just the books you have been waiting for. In them you obtain in Dr. Murphy's own magnetic language everything this brilliant operator, this keen diagnostician says and does, taken down verbatim by an expert stenographer and illustrated by artists right in the amphitheater. They give you hundreds of points in diagnosis and treatment you cannot get anywhere else—hundreds of those "Murphy wrinkles" that will enable you to make definite a diagnosis that most men would label "doubtful"—that will enable you to get results where most men fail.

FURTHER, THE MEDICAL SIDE OF THE CASES IS NOW GIVEN

This by DR. CHARLES L. MIX, Professor of Physical Diagnosis at the Northwestern University Medical School, Chicago—Particular attention is given diagnosis, especially in abnormal conditions. The importance of this is obvious. The same plan is carried out in all cases that show complications and that present symptoms connected with the spine or brain. In addition, DR. RICHARD J. TIVNEN, also of Northwestern, goes over all cases with *eye symptoms*. The significance of eye symptoms is playing an important part in diagnosis these days. Have you seen the *April number*?

Issued serially, one number every other month (six numbers a year), each number containing about 150 octavo pages, illustrated. Per year: \$8.00: cloth, \$12.00. Sold only by the calendar year.
